

Supply Chain Futures offer a **comprehensive recruitment service** across all parts of the value chain.

Company Profile

Supply Chain Futures offer a comprehensive recruitment service across all parts of the value chain, covering both interim and permanent appointments.

Our goal is to provide a swift, responsive and effective service, built on years of experience in the supply chain and logistics industries. By consistently applying a collaborative and consultative approach, we are able to deliver a service-centric recruitment solution to every assignment's unique requirements.

Over a 10 year period, we have developed a network of consultants, leaders and managers specialising in supply chain management. We continually review and develop our network in order to provide our clients with the best possible talent pool. Our network has been developed through personal referrals, recommendations and pre-existing relationships.

Our knowledge and ability to examine and consider complex needs will, in collaboration with the client, determine the most appropriate resource solution.

Our streamlined account management team provide a professional service with the personal touch our clients find invaluable.

Our Aims and Objectives

We aim

- To deliver a value added service to all individuals, associates and clients based on quality not quantity
- To give honest feedback and advice
- To understand a client's business or individual's needs, and create long term partnerships with both
- To own the recruitment process and present the best possible solution for each assignment

Our Objectives

- To help organisations identify and source the ideal skill sets, characteristics and cultural fit for their management teams.
- To help individuals find the ideal opportunities to match their career ambitions and personal development.
- To be the 'partner of choice' for every client or individual we engage with

Our Services and Specialisms
